

D*- All diodes 1N4007

- * Show in many TW schematics as a single 18k2 4W resistor, but usually implemented this way
- ** R30a and b can be replaced with a single 470k3W resistor
- *** C17a & b shown as a single 80µF cap in some schematics

Trainwreck Liverpool

Based on the designs of Ken Fischer

Based the M. Kröger schematic and Liverpool86 photo
